SUMMARY

Game designer with around 2.5 years of experience designing and shipping mobile games at three studios: casual puzzle games and story-driven puzzle adventures. I design how a game plays, write the documents that art, development and QA teams build from, and use player data to improve a game after launch.

EXPERIENCE

Tap N Play Studios · Unity Game Designer — **Oct 2025 – Mar 2026**
Full time · Bengaluru

- Designed two mobile puzzle games, **Alien Out** and **Loopy Duck**, from first idea to Google Play release in about two months each
- Tuned difficulty and pacing using retention data: how many players come back after 3 and 7 days
- Wrote detailed design specs in Figma (rules, screens, animations, edge cases) that art, development and QA built from
- Researched competitor ads and wrote the ad concepts, scripts and briefs for each game

Surag Studios · Game Designer — **Apr 2025 – Sep 2025**
Part time · Remote

- Sole game designer on a story-driven mobile game, working under the lead designer; wrote every design document and gameplay flow from scratch
- Designed puzzles and interactive scenes that support the story instead of interrupting it, delivered on every deadline

G.round · Game Reviewer — **Feb 2023 – Feb 2025**
Freelance · Remote

- Played games before release and wrote structured feedback on gameplay, visuals and mechanics

Vincell Studios · Junior Game Designer — **Apr 2022 – Nov 2023**
Full time · Bengaluru

- Designed levels and puzzles for five puzzle-adventure games, four of them published
- Designed and balanced 20+ level mechanisms, with a difficulty curve that keeps new players moving
- Wrote the design documents for my chapters (puzzle logic, story structure, level flow, user experience) and built clickable Figma flows so developers could build without back-and-forth
- Ran internal playtests and improved levels based on what players actually did

EDUCATION

Professional Diploma, Game Design — **2024 – 2025**
Asian Institute of Design, Bengaluru

BCA, Game & Mobile App Development — **2019 – 2022**
CMR University, Bengaluru

LANGUAGES

English, Hindi, Kannada

SKILLS

Game design documents (GDD) · Level & puzzle design · Core gameplay loops · Difficulty balancing · Player data & retention · Prototyping · Playtesting · UI/UX flows

TOOLS

Figma · Unity · Machinations · Photoshop · Google Sheets & Docs · AI prototyping

TOOLS I BUILT

Prototype pipeline ↗ A one-page spec format (rules, mechanics, win and lose states) that an AI tool turns into a playable prototype. Idea to playable in hours instead of days.

Store tracker ↗ Tracks new game releases and chart movement on Google Play and the App Store, used to spot trends for new game pitches.

SHIPPED GAMES

Alien Out Tap N Play ↗ · **Loopy Duck** Tap N Play ↗ · **Hidden Escape: Murder Mystery 2** Vincell ↗ · **Hidden Escape: Lost Island** Vincell ↗ · **Escapeverse Puzzle Adventure** Vincell ↗ · **Hidden Escape: Island Mystery** Vincell ↗

Underlined text and ↗ items are links: the store page, or my portfolio page for each game.
